Install Xrecovery Xperia X8

Once it starts (something like the following picture), use the volume-up and volume-down buttons to scroll through the menu.. zip for CWM recovery, please go to Use the attached which is modified and tested to work correctly with this recovery.. This video is a full guide to install Android Lollipop 5.1 on Xperia X8 Xrecovery: <http://www..> It may sound easy, but sometime we just make mistake So testing is required To boot into the console, restart your phone and press the back button a few times after the white text Sony Ericsson logo appears (its the first logo that appear when you start up the phone).. mediafire.com If you are confidence with the installation, its time to do some testing.. Press the home button to select an option and the back button to go back The Clockworkmod recovery is working on our X8 now * I am not responsible for any brick or damage to your phone, so be cautious! The package script for CWM recovery is different from xRecovery, don't try to flash xRecovery script with CWM recovery, errors might occur If you want to create update.
